

BOARD SETUP

1. Place the gaming boards (1, 2). on the light-tables.
2. Place the encounter booklet onto the 2. board.
3. Place the Growth board according to the player number onto the 2. board.
4. Place the beacon tokens randomly and face-off onto the grey fields of the SPACE AREA.
5. Place the cabin tiles exactly onto the SPACE AREA fields shown in the picture.
6. Place 1-1 status markers onto the black circle
 - of the meeting point of the Cord and the Circulation track.
 - of the gap between the Enemy phase and Jump phase on the Circulation track.
 - of the stowaway track (behavior marker to "sleep").
 - of the hull and overdose charts on the ship track.
 - of the health and infection charts on the body track.
7. Place the four sanity markers onto the stowaway track.
8. Choose a character. Place your figure onto the hybernation cabin.
Place the character markers with the corresponding colours onto the circle of:
 - the capsule, next to the droid icon (one droid marker).
 - the crewmembers track (stamina marker to "relaxed", symptom marker to "exhausted").
 - the acting moment of the Crew phase on the Circulation track. The order is determined randomly.
9. Place the basic cabin, upgraded cabin and organs with the trays together onto the 2. board.
10. Place the malicious marker tray onto the 2. board (- fire,poison, breach, ion, intruder, lesion, hack).
11. Place the substances-(matter,parasite), items/units-, and extra markers tray (shield,radar,storage,personal) onto the 1. board.
12. Fill the Item bag with the basic items and put the bag onto the middle of the Growth sheet
13. Download the app (WOMB the game) from the playstore onto your android device. Start the application.
If you play for the first time, go to the app Menu, and read the app tutorial by pressing the HELP Button.
